

We have been using BCMTrac for over two years now and have not looked back. It is an impressively user friendly system, resulting in valuable time saved to focus on other pertinent areas of community scheme management. Bookkeepers are especially able to do so much more in less time. Also worth mentioning is the on-line assistance that has proven to be a great help! Would definitely recommend this system to other managing agents as it is always improving and moving forward in a technologically competitive world.
