

Stellar Property Management launched in March 2018 with BCMTrac software. The BCMTrac team have been supportive throughout. As a start-up, we relied upon the team for advice and direction. This was forthcoming in every instance; the support team always patient and willing to help. Relationships have been built with the BCMTrac team. I cannot overemphasize the value of picking up the phone and connecting with someone who is interested in helping me move forward.

The software itself is user-friendly and intuitive. Every aspect of the property management process is covered. The system reporting is thorough and a huge time-saver. We also love the fact that it is web based and accessible from anywhere. Clients love it too – especially the fact that they can log in at any time and see latest status of scheme.

BCMTrac is an all-in solution. We recommend the software without hesitation. You will not be disappointed!
